SUMMARY

Full-stack engineer with 4+ years of Java development experience, specializing in Java-based web application development. Experienced in large-scale system re-architecture, system maintenance, and cross-team collaboration, with a demonstrated ability to proactively clarify technical problems and propose practical solutions. Also experienced in unit testing, Python automation tooling, and Helm-based deployment configuration.

EXPERIENCE

WITS CORP. | Senior Software Engineer

2025.05 - Present

- Led Spring Boot version upgrades (2.x to 2.7.18) across approximately 10 client Java projects; for 3 of these projects, additionally completed unit test coverage, vulnerability remediation, and sanity-check verification scripts to ensure consistent system behavior post-upgrade.
- Implemented Helm configuration standardization and canary deployment migration across 2 systems through 8 staged pull requests, and independently developed Python automation scripts for 6 of the migration steps.

MERCURIES DATA SYSTEMS LTD. | Full-Stack Engineer

2022.06 - 2025.02

- Contributed to the re-architecture of a renewable energy billing calculation system as part of a 20-person on-site team; owned full-stack development of the Contract module (Java Spring MVC / MyBatis / Oracle SQL), collaborated with upstream and downstream teams, and supported the SA in evaluating requirement feasibility and technical approach, gradually taking on a technical decision-support role within the Contract team.
- Worked with the DBA to resolve legacy-to-new data format compatibility issues during system consolidation (e.g., address field standardization), adjusting both existing data and application logic to accommodate edge cases.
- Continuously handled post-launch feature requests and system maintenance, accounting for over 50% of the team's related workload, ensuring stable operation and ongoing system improvement.

INTUMIT INC. | Full-Stack Engineer

2022.02 - 2022.06

- Owned full-stack development and maintenance of an intelligent customer service platform (Backbone.js / Java Spring MVC / MySQL); during a period of reduced team headcount, independently handled customization, vulnerability remediation, on-site client debugging, and version releases while managing up to 5 concurrent client requests.

EDUCATION

National Taiwan University | M.S., Master's Program in Plant Medicine

2015.09 - 2018.06

National Taiwan University | B.S., Dept. of Plant Pathology and Microbiology

2011.09 - 2015.06

CORE SKILLS

Back-End: Java, Spring MVC / Boot / Batch, MyBatis, Hibernate

Front-End: HTML5/CSS, JavaScript, jQuery

Database: MySQL, MSSQL, Oracle, DB2

Automation & Deployment: Python, Helm

Tools: Jenkins, Git, Postman, Ubuntu, Jupyter, Oracle CC&B
